Home: Mtubatuba,

◆ ABOUT ME

Passionate, solutions-oriented Computer Science graduate from the University of KwaZulu-Natal with a strong foundation in Java, OOP, data structures, algorithms, and full-stack development. Currently pursuing Honours in Computer Science. I have built real-world software systems from scratch (school projects) including a machine learning model for financial instrument recognition and a time series forecasting engine demonstrating the kind of practical, production-minded thinking that companies value. I am a fast learner who thrives in team environments, codes for clarity and impact, and is genuinely excited to work on live client projects from day one.

Why BBD? BBD builds enterprise-grade, real-world software across banking, insurance, and telco — exactly the environments my projects have targeted. The structured year-long programme, mentorship culture, and live client team model from Day 1 is precisely the accelerated growth path I am looking for. I don't want a classroom — I want a codebase.

◆ EDUCATION

BSc Honours — Computer Science · University of KwaZulu-Natal 2026 – Present

- ▶ Currently enrolled; deepening research capability, advanced algorithms software engineering theory, Machine Learning and AI.

BSc Computer Science & Information Technology · University of KwaZulu-Natal 2023 – 2025

- ▶ NQF Level 7 undergraduate degree — completed
- ▶ Core modules: Data Structures & Algorithms (Java) · Advanced OOP · Artificial Intelligence · Database Management & Networking · Computer Organisation & Architecture · Advanced Systems Analysis & Design · Agile Development · Foundations of Computer Science · Project Management

◆ TECHNICAL SKILLS

Primary Languages

Java: OOP, Data Structures, Design Patterns, Collections, Generics

Python: ML, Time Series Analysis, scripting, data pipelines

C++ / C#: Systems programming, .NET / ASP.NET Framework

SQL: Relational DB design, queries, stored procedures

Tools & Ecosystem

Web Stack: HTML5, CSS3, JavaScript

Platforms: Linux (Ubuntu), Windows, Git, GitHub

Methodologies: Agile/Scrum, SDLC, OOP design principles

Productivity: Microsoft Office Suite (Word, Excel, PowerPoint)

◆ PROJECTS — SCHOOL PROJECTS

Time Series Analysis — Electricity Consumption Forecasting · Python | Statistics | ML 2026

- ▶ Built a complete time series pipeline: data ingestion, cleaning, trend decomposition, seasonality analysis and forecasting
- ▶ Implemented ARIMA-style statistical modelling to predict consumption patterns skills directly applicable to data-driven enterprise software

South African Banknote Recognition System · Python | Machine Learning | Computer Vision 2026

- Designed and trained an ML image classification model to identify SA currency denominations
- End-to-end project: data collection, model architecture, training, evaluation and deployment
- Real-world AI system with direct applicability to fintech and compliance domains
- Repository: <https://github.com/LunganiFk450>

E-Commerce Platform · ASP.NET | C# | HTML5 | CSS | JavaScript | SQL 2025

- Full-stack web application: product catalogue, cart, checkout, user authentication, order management
- Demonstrates end-to-end systems design, REST principles, relational database architecture and UI development

Point of Sale & Inventory Management System · C# | OOP | SQL 2025

- Architected a complete multi-module Java POS system with real-time inventory tracking
- Applied core OOP principles: encapsulation, inheritance, polymorphism, abstraction production-quality code structure

Interactive Quiz Game · C++ | UI | Game Logic 2025

- Built a fully interactive quiz game with a UI-driven interface allowing players to select answers from multiple-choice options
- Implemented real-time scoring logic: correct answers increment the score, with immediate on-screen feedback per response
- Demonstrates strong C++ fundamentals control flow, functions, state management, and user input handling
- Highlights ability to design engaging, user-facing applications with clean program architecture

◆ WORK EXPERIENCE

Merchandise · Majiphi Photos and Tuckshop Dec 2020 – Jan 2021

- Managed product placement, shelf optimization and inventory replenishment in a customer-facing retail environment
- Demonstrated reliability, attention to detail and professional conduct — foundational workplace skills

◆ SOFT SKILLS

- | | | |
|---|---|----------------------------------|
| ▸ Fast, self-directed learner | ▸ Problem-solving & root-cause thinking | ▸ Initiative & ownership mindset |
| ▸ Strong verbal & written communication | ▸ Adaptability in fast-paced environments | ▸ Resilience & growth mindset |
| ▸ Collaborative team contributor | ▸ Attention to detail & code quality | ▸ Professional work ethic |

◆ PERSONAL DETAILS

Nationality: South African

Gender: Male

Languages: English

Address: P.O. Box 752, Manzamandi, Mtubatuba, 3935, KZN
